

Light Reflectivity

**2.5 mm LVT with Diamond 10® Technology**  
*Duo™*

All light reflectivity values listed are based on a percentage system, the higher the percentage (e.g. 20-24, 35-39), the higher the light reflectance of the floor. It is measured per ASTM E1349, *Standard Test Method for Reflectance Factor and Color by Spectrophotometry Using Bidirectional (45°:0° or 0°:45°) Geometry*. Research indicates reflectance can help drive daylight further into space and reduce reliance on artificial lighting, resulting in reduced electricity usage and costs. Glare from flooring is a characteristic of glossy finishes, not reflectance. Flooring in lighter colors with a matte finish have high reflectance values, but do not add to glare. Flooring with light reflectivity values great than 25% can contribute to the LEED® Interior Lighting Credit.

Value	Sku Numbers
0-9	ST2PR, ST510, ST511, ST513
10-14	--
15-19	ST514, ST515, ST516, ST517, ST518
20-24	ST519
25-29	ST528, ST529, ST523
30-34	ST524, ST525
35-39	ST526
